

WOOD CHIPPERS

TAR RIVER IMPLEMENTS

Tired of all those piles of branches laying around? Need to cover your flowerbeds in a practical and attractive way? Try the Tar River Implements BWC Series Wood Chipper for your home landscaping needs.

The Tar River Wood Chipper is the perfect tool to help you clear your land of fallen limbs and branches. Use your wood chips to create beautifully covered flowerbeds and natural areas in the yard. Wood chips not only look nice, but they also help regulate soil temperature, retain moisture and even improve plant growth by helping release necessary nutrients into the soil.

We now have a series of Self-Contained Hydraulic Feed Chippers. This series is available in 4", 6", 7" and 8" chipping capacities. The 7" chipper has dual roller feed capability. These chippers come equipped with internal hydraulic pumps that are run by the tractor PTO
